WELCOME **Statement**

At Icy Flame, we offer more than just products and services; we deliver a comprehensive experience that sets us apart. Our commitment to exceptional quality, rapid solutions, value for money, open communication, and sustainability is second to none. What truly distinguishes us is our focus on creating a partnership that ensures your satisfaction. With transparency, innovation, and dedication, we're not just in the business of serving you; we're in the business of your success. Thank you for choosing Icy Flame, where our mission is to exceed your expectations and create a lasting legacy of trust and excellence. Your success is our driving force, and your journey with us is the cornerstone of our shared accomplishments."

Joseph Karungo, CEO

About Company

Icy Flame Cooling is a renowned Heating, Ventilation, and Air Conditioning (HVAC) company located in the Kenyan capital, Nairobi. The company has a dedicated team of engineers who provide a complete HVAC solution to cater to the needs of various refrigeration and mechanical works, matching the latest requirements of the Refrigeration and Air Conditioning industry.

The industry has continued to witness excellent service in the HVAC sector for almost a decade. We bring with us rich experience in the field of simulation, treatment, and control of indoor air. Comfort is the key essence in the accomplishment of our finished work, irrespective of the application: residential, commercial, or industrial.

We believe that no work is possible without the cohesive force of its people. It would not be an exaggeration to say that Icy Flame Cooling has a competent team of experienced engineers, technical supervisors, and a skilled workforce capable of accomplishing any magnitude of work. Our technical experts design, install, and fine-tune HVAC systems for offices, hotels, and many more.

With a focus on clean rooms and clean room technology, Icy Flame Cooling brings air conditioning products and technologies from companies that are world leaders in their areas of operation to the Kenyan market. We help design clean room facilities, identify products suited to specific needs, supply, and install them to international standards.

Meet Our Team

Joseph Karungo

CEO

As the visionary leader of Icy Flame Company, Joseph oversees strategic direction, innovation, and growth, ensuring the company remains at the forefront of HVAC and solar energy solutions.

Maureen Ndungu

Managing Director

Maureen drives the company's operations and business strategy, ensuring efficiency, excellence, and sustainable growth across all divisions.

Moses Wainaina

Solar Solutions Engineer

Moses Wainaina combines technical expertise with innovative thinking, providing clients with reliable, high-performance solar solutions that maximize energy efficiency and sustainability.

Samuel Njuguna

Sales Engineer

Samuel combines technical expertise with customer solutions, ensuring clients receive the best HVAC and solar technologies tailored to their needs.

Exparanza Mbithe

Lead Architect

Exparanza designs and oversees innovative, energy-efficient building solutions, integrating HVAC and solar technology into modern infrastructure.

Dorcas Muthoni Kioi

Marketing Lead

Dorcas is actively involved in strategic planning, team leadership, campaign execution, and performance analysis, ensuring that all marketing initiatives align with organizational goals and deliver measurable results.

Cyrus Kuria

Sales Executive

Cyrus drives sales and customer relations, helping clients find the right solutions for their HVAC and solar energy needs.

Grace Wambui

Procurement and Supplies

Grace handles procurement and supply chain logistics, ensuring the company has the best materials and equipment for efficient service delivery.

Vision & **Mission**

■ **Vision**

Initiating, supporting and providing technologically advanced & energy-efficient systems for Africa.

■ **Mission**

Providing the most efficient, most relevant, most advanced HVAC operational systems to satisfy the proactive demands of cool chain Management in an ever-growing Nation.

Our History

Incorporated in 2015, Icy Flame Cooling is a leading refrigeration company dedicated to strengthening the connection between businesses and their valued customers through an efficient cold chain system. We provide seamless cooling and refrigeration solutions that enhance food quality and extend product shelf life.

Recognizing the growing demand for high-quality refrigeration products and expert solutions, particularly in the commercial and industrial sectors, Icy Flame Cooling has consistently delivered engineered, flexible, and reliable HVAC solutions tailored to meet diverse industry needs.

Our Services

Refrigeration Services

At Icy Flame Cooling Solution, we specialize in providing top-notch refrigeration services that cater to a wide range of industries and applications. Our experienced team of professionals is dedicated to ensuring that your cooling needs are met with the highest level of expertise and precision. Whether you require refrigeration solutions for commercial, industrial, or residential purposes, we have the knowledge and technology to create customized systems that keep your spaces and products at the ideal temperature. With a commitment to energy efficiency and environmentally friendly practices, we deliver reliable and sustainable refrigeration solutions that help you preserve the freshness of your products, maintain precise temperatures, and reduce operating costs. Our Refrigeration services includes:

- Design & Installation:
- Upgrades & Modernization:
- Training and Education
- Maintenance & Repair
- Custom Solutions
- Routine Inspections
- Remote Monitoring
- Spare Parts
- Emergency Services

Walk-In Coolers and Freezers:

Custom Cold Rooms

Pharmaceutical Cold Rooms

Cold Storage Warehouses

Freezer Cold Rooms:

Mortuary Cold Rooms

Our Services

Air Conditioning Services

At Icy Flame Cooling Solution, we are your trusted source for all your air conditioning needs. Our expert team is dedicated to providing top-tier air conditioning services and equipment to keep your home or business cool and comfortable year-round. Whether you're looking for the installation of a new, energy-efficient cooling system, require maintenance and repairs for your existing unit, or want to improve indoor air quality, we have you covered. Our range of services includes:

- Professional Installation
- Routine Maintenance
- Emergency Repairs
- Energy Efficiency Upgrades
- Custom Solutions
- Routine Inspections
- Remote Monitoring
- Spare Parts
- Indoor Air Quality Solutions

Centralized Commercial HVAC Systems
(These are large-scale systems designed to cool entire commercial buildings. They include rooftop units, chillers, and air handling units.)

VRF (Variable Refrigerant Flow) Systems
VRF systems provide efficient heating and cooling for larger commercial spaces. They offer zoning capabilities and can simultaneously heat and cool different areas.

Commercial Split Systems
These systems combine indoor and outdoor units and are suitable for cooling specific commercial zones or areas.

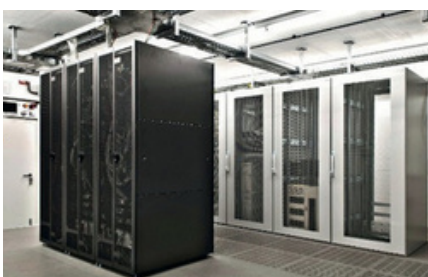

Package Units
These are self-contained HVAC systems used for smaller commercial spaces. They include both heating and cooling components in one unit.

Chillers
Chillers are used for cooling large commercial spaces and are often found in office buildings and industrial settings.

Ducted Air Conditioning Systems
These systems use ductwork to distribute cool air throughout a building and are commonly used in larger commercial spaces.

Server Room Cooling
Specialized cooling solutions for data centers and server rooms to maintain optimal temperatures for sensitive equipment.

Commercial HVAC Maintenance Contracts
Scheduled maintenance and repair services to ensure the proper functioning of commercial HVAC systems.

Air Conditioning Spare Parts
Supplies of Ac spares, Fans & Diffusers, Condensing Units, Evaporators, DUCTLESS, MINI-SPLIT AC, Portable AC, Suction Fan Inline, Axial Duct Fan, etc

Prefab Houses

Prefab houses, also known as prefabricated or modular homes, are becoming increasingly popular due to their efficiency, sustainability, and flexibility. These houses are constructed in sections or modules off-site in a factory, and then the components are transported to the construction site for assembly. Here are some common types of prefab houses and related services:

- Design and Customization
- Manufacturing & Production
- Transportation & Delivery
- Assembly and Installation
- Maintenance and Repairs
- Foundation & Site Preparation:
- Permitting & Regulatory Compliance

Prefabs houses are ideal for:-

Schools | Hospitals | Security camps, Temporary Housing, Disaster-Resistant Housing etc

Pack Houses

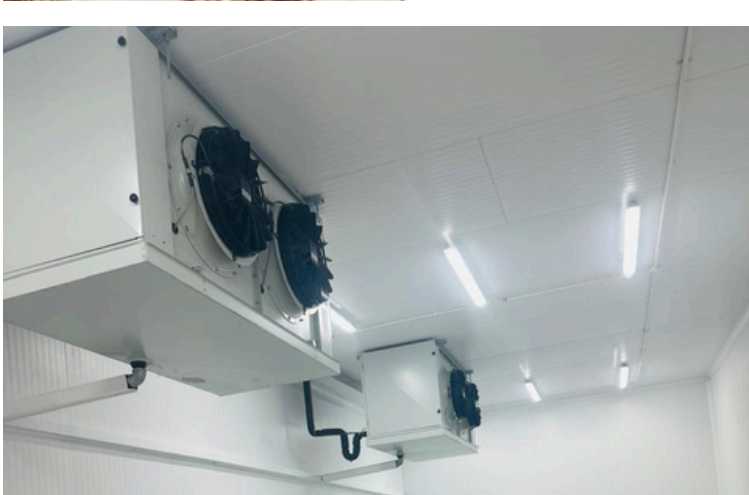

Pack houses, also known as packing houses or packing facilities, play a crucial role in the agricultural and horticultural industries. They are facilities where harvested crops are sorted, graded, processed, and packaged for distribution to consumers, wholesalers, or retailers. Here are some key aspects of pack houses and related services:

- Fruit Packing Houses
- Vegetable Packing Houses
- Flower and Floriculture Packing Houses
- Grain and Seed Packing Facilities
- Specialty Crop Packing Houses
